

1

Confirm template is being rendered using alert

```
// js.erb
alert("The template renders!");
```

2

Replace ERB render calls with static strings

```
$("#my-selector).html("<%= render(...) %>");

// becomes...

$("#my-selector).html("Test string");
```

3

Wrap template content with a try-catch

```
try {
  // ...
} catch(e) {
  console.error(e);
}
```

4

Re-introduce ERB render calls and look for Ruby errors

5

Make sure every ERB render call is escaped properly

```
$("#my-selector").html("<%= escape_javascript render(...) %>");
```
